Summary

I'm a Data & AI Engineer with a strong focus on building end-to-end cloud data solutions on Microsoft Azure. I enjoy working across the full data lifecycle—right from ingestion to transformation, orchestration, analytics, and AI. Most of my work revolves around Microsoft Fabric, Azure Data Factory, Lakehouse architectures, and Azure AI (OpenAI/RAG).I've had the opportunity to lead customer POCs, design solution architectures, and build hybrid data platforms that help teams modernize their data landscape. I work closely with both technical and business stakeholders to understand their needs and translate them into practical, scalable cloud solutions.What motivates me most is simplifying complex technologies, creating real business impact, and helping customers succeed. I'm also actively growing my knowledge and network within the Microsoft community, as I aspire to build my career toward becoming a Cloud Solution Architect – Data & AI. Specialties:ADF | Microsoft Fabric | Lakehouse | Data Engineering | Azure OpenAI | RAG | DevOps | Pipelines | ETL/ELT | AI Agents | Data Architecture | Customer POCs | Cloud Migrations What I enjoy:Working with customers, solving real data problems, designing scalable Azure solutions, and learning new things in the Data & AI space.
